

That Tired Feeling

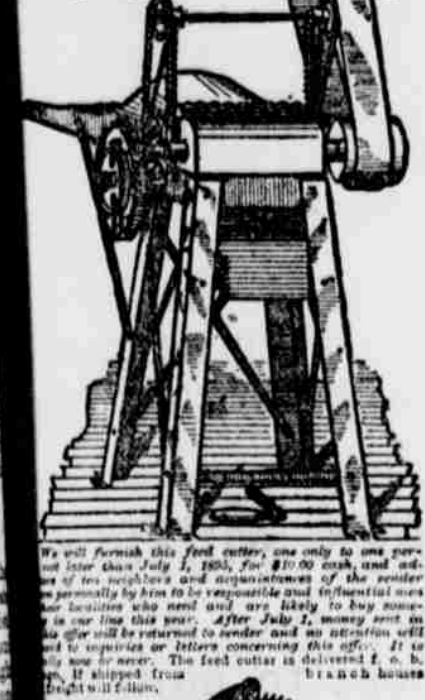

Is a certain indication of impure and impoverished blood. If your blood could always be rich and pure, full of the red corpuscles upon which its vitality depends, you would never be weak, or nervous! Boils, pimples, scrofula, salt rheum, would never trouble you. But our mode of living, shut in all winter in poorly ventilated homes and shops, depletes the blood and there is loss of appetite and weakness. Hood's Sarsaparilla is the standard remedy for this condition. It purifies, vitalizes and enriches the blood, overcomes that tired feeling, builds up the nerves and gives perfect health. Read this:

Our daughter, Blanche, when four years of age had a humor break out on her hands and face, which our physician pronounced eczema. If the cold air reached her face or hands they would swell up, look almost purple, and headed blisters would form and break.

Hood's Sarsaparilla Is the Only True Blood Purifier

Prominently in the Public Eye Today.

The Aermotor All Steel Feed Cutter Worth \$40 FOR \$10

We will furnish this feed cutter, one only to one person in each town, for \$10.00 cash, and will deliver it free of charge. The cutter is made of all steel and is guaranteed to cut any kind of feed, including corn, clover, alfalfa, etc. It is a great saving to the farmer and is a must for every household.

KENNEDY'S Medical Discovery
Greatest Medical Discovery of the Age.
KENNEDY, OF ROXBURY, MASS.,
discovered in one of our common weeds a remedy that cures every humor, from the worst scrofula to a common pimple. He tried it in over eleven hundred cases and never failed except in two cases (under humor). He has now in possession over two hundred certificates of cure, all within twenty miles of him. Send postal card for book. It is always experienced from the lungs, and a perfect cure is warranted. Right quantity is taken. The lungs are affected it causes pains, like needles passing them; the same with the Liver. This is caused by the ducts being blocked. Read the label. If stomach is foul or bilious it will cause feelings at first. A dose of diet every necessary. Eat what you can get, and enough of it. It is the best in the world. Other day.

MODEL HOUSES
100 FOR \$1. 250 FOR \$2.
On receipt of \$1, we will send, prepaid, a beautiful printed on heavy plate paper, the latest designs of "Shoppell's Modern Houses," photographs views, large floor plans, cost to build, etc. Fully describing and illustrating 100 NEW BUILDINGS of low and moderate cost. Or 250 of them for \$2. Most helpful aids ever devised for intending builders.

Patent Typewriter, Edison Phonograph, and Hand Typewriters.

PISO'S CURE FOR CONSUMPTION
Cures where all else fails. Best Cough Syrup. Translated from the original. Use immediately.

THE INDUSTRIAL OUTLOOK

STEADY IMPROVEMENT.

Prospects of Idle Factories Starting Up Soon—Building Boom.

That the general business situation is steadily improving is clearly evidenced by the advances in crude material and staple commodities. This, to say the least is gratifying which is aiding and improving the industrial situation. The only cloud in sight just now is the striking agitation among the coal miners. In Iowa a large number are already out, and trouble is anticipated in Pennsylvania, which may spread over Ohio, Indiana and Illinois. This, however, will be welcomed by the operators, as it would lead to a readjustment of wages and would afford an opportunity for the trade to consume the surplus stock which has accumulated on the market.

Reports come from all points that factories and mills that have been long idle, and that have not yet been put in operation, are being made ready for an early start, and many are the enterprises now projected. One of the most encouraging features of the week is the fact that there has been some slight improvement in prices. The absence of this feature for some time has occasioned some misapprehension, but the movements in this direction during the past few days have been most encouraging. The building trade is looking up in all directions, and there are new indications that employment in this line will soon be abundant, and continue so throughout the season.

THE NEXT MOVEMENT.

It Will Be An Exodus From the Cities to Occupy Small Farms.

The next great labor movement in large cities will not be town looting or "boom" schemes, but toward farms. The tendency this spring in many of the cities toward experimenting for themselves with the "Detroit plan" will add this movement materially. It will prove to many a hangover in the cities, who have lived from hand to mouth for years, that he can support his family in comparative independence by his own labor on a very small piece of ground. It will teach the charitably inclined, also, a needed lesson. Charity as usually extended to the needy is degrading in this it cultivates a desire to obtain something for nothing but to help out to obtain a chance to earn an honest living benefits the giver, the recipient and the community at large. Machinery is crowding out of nearly every vocation. Machinery, of course, is used on the farm, but one need not be a millionaire to possess the utensils necessary for cultivating the soil successfully and even the best farm implements are inexpensive in comparison with those of other industries.

The man who raises enough for his own family and a little more is sure of a market for his surplus at some price. The movement in this direction is becoming quite general throughout the country, and colonies of laboring men are being organized in all the large cities and crowded manufacturing and commercial centers, many of which will secure large tracts of land and make in the business of farming on the co-operative plan. A large company of old war veterans in Minnesota have organized a colony, and purchased a large tract of land in Georgia, on which they will locate. An effort is being made among the unemployed railroad men of Cincinnati to organize for the purpose of colonizing on farming lands in the South, but as yet no definite action has been taken. It is generally believed that this is the most feasible plan by which it may be hoped to improve the condition of the laboring class in the cities that are now over-crowded, and it is probable that the Government will soon take an interest in the matter and lend a helping hand.

Will Cut Coal Prices.
It is reported that as soon as the lake season opens the price of coal mining in Ohio will be put down to 10 cents per ton. This will enable Ohio operators to get all the big lake contracts by underbidding the Pittsburgh operators. The Ohio miners are thoroughly indignant at the Pittsburgh miners for not standing out against a reduction and will now serve the Pittsburgh miners out.

Lake Trade.
Lake commerce will be in full blast this week, and it is expected that within the week a fleet of 60 vessels, laden with 5,000,000 tons of wheat, corn and oats, will have sailed for Buffalo and the lower lake ports. The prospects for a heavy season's business are not as promising as last year, as the first grain fleet from Chicago will take out a million bushels of grain less than last year's start.

LABOR NOTES.
Experienced and practical harness-makers are wanted by J. J. Davis, Ashland, O., and A. E. Young, Mt. Gilead, O.

The Parry Manufacturing Company at Indianapolis, and John Hoppert, Akron, O., want to employ carriage-painters.

John Grudolph, Indianapolis, Ind., will give employment to an experienced iron-smith who can do fine carriage work.

Coat-makers are wanted by Bart Rowe, Lebanon, O., and Henry Rong, Grafton, W. Va.

The Banner Baggy company will give employment to two experienced top makers, at their factory, in Columbus, O.

The Carrollton Woolen Company, Carrollton, Ky., wants to employ ten good weavers. Good wages and steady work promised.

A general demand comes from all parts of the country for tailors—pants, coats and vest-makers. Especially is this true of the small cities and towns.

NEGROES WALKING HOME.
Did Not Find Durango What It Was Pictured to Be.

Letters received at the City of Mexico from the state of Durango announce that the negro emigration scheme of that state under the management of persons from the United States is a complete failure. Most of the negroes are on their way back to the States, tramping toward the Rio Grande. They are barefooted and in almost destitute condition, depending on the aid received from the ranches to keep from starving.

A Western Simoom.
W. A. Deuell, general superintendent of the Colorado division of the Union Pacific railway passed through the territory which was swept by the sandstorm. "No writer could exaggerate," said Mr. Deuell "the simoom which visited western Kansas and eastern Colorado. Clouds of sand were driven through the air by a high wind, obscuring all objects and rendering existence almost impossible for man and beast. A man venturing into a whirlwind of sand invariably returned in a few minutes with his face bleeding from hundreds of cuts. The men employed to clear the railroad cuts of the drifts of sand and snow were unable to work more than half an hour without being relieved. At Cheyenne Wells, Col., a station on the Union Pacific, 12 cars of sand were taken from the depot platform. Cuts were filled with immense drifts which averaged about two-thirds sand and one-third snow. The bodies of two sheep herders who were overcome by the storm have been found, and others are reported missing. The loss of range cattle was great.

BANDITS GET \$16,850.

By Holding up a Wells-Fargo Express Wagon.

The mail and express wagon which connects with the Midland Terminal Railroad at Grosey was boarded Thursday about two miles from Cripple Creek, Col., by two men, who overpowered the driver, Robert Smith, secured an express package containing \$16,600 and escaped on foot.

The hold up took place about 9:30 o'clock on the summit of Tenderfoot Hill, on the highway between Cripple Creek and Grosey. The mail and express wagon was en route from Grosey to Cripple Creek.

Two men sitting beside the road accosted Smith, asking for a ride. He drew up his team and one of the men climbed up to the seat beside him while the other mounted the baggage behind. As soon as Smith started to drive on the man behind struck him on the head several times with a revolver. The blow staggered, but did not stun him. The man with the gun also drew a revolver, and, leveling it at him, commanded him to get down, walk to the horses and hold their bridles.

He complied, and while he was covered with their guns, they ripped open and rifled the mail and express packages. After securing \$16,600, the mail was being shipped to the Cripple Creek banks, and several other valuable packages they unhitched the two lead horses, mounted them and rode off rapidly into the mountains.

Smith, who was very weak and bleeding profusely, drove into the city as quickly as possible. When he drew up in front of the Wells-Fargo express office he fainted and fell from his seat. He was revived in a few minutes and related what had befallen him.

A Spanish Bull Fight.

In the course of a bull fight at Barcelona, Sunday last, a charged bull jumped over the barriers and among the spectators. A wild rush was at once made for the exits and in the stampede several persons were injured. The employees of the bull ring made an attempt to capture the bull, but they could not get him and finally a civil guard fired at him with his carbine, killing the animal and one of the spectators. As soon as it was known that the bull was dead, the spectators hurried back to their seats and the entertainment proceeded as though nothing out of the ordinary had happened.

Pittsburg and Lake Erie Canal.

The preliminary survey of the ship canal to connect Pittsburg with Lake Erie has progressed so far that the engineers in charge of the work are free to state that they have found the proposed canal perfectly feasible and that an abundant supply of water can be secured. The survey will not be completed before June 1, however. According to the engineers, the most available route is through the Mahoning Valley to Leavittsburg and thence to the lake.

Cesar, the New York colored murderer, pleaded not guilty in court.

Shattered Cups and Superstition.

A friend who often stayed with the Lesseps family says that the count never seemed to lose sight of the education of his children, even in the smallest detail. One morning at breakfast a beautiful Dresden teacup was broken. "Ah!" cried the countess, "a disaster! Two more of that set will now be broken. It always happens so."

"Are you so superstitious," asked the count, "as to really believe that two more will be broken?"

"I know it."

"Then let us get it off our minds." And, taking two of the cups by the handles, he dashed them together. The anger and dismay of the countess proved conclusively that she had not superstitiously held to her superstition. It also loosened any hold the absurd idea may have had on the minds of the children.

—Kate Field's Washington.

Odd Preferences in Plows.
Manager Frank M. Whitney, of the New Castle Plow Works, makes a curious assertion. He says: "Plows are made differently for certain countries and States. The tendency of a son is to use the same kind of a plow used by his father. In Lawrence County the use of the left-handed plow is almost the rule, but in Mercer County the right-hand plow is used, and this unaccountable difference in the kind of plow used extends to other States in the Union. In central and eastern Pennsylvania the left-handed plow is used, and wherever the Amish-German farmers have emigrated from this county the sons are almost sure to use the left-handed plows. We would never dream of sending a left-handed plow to Michigan, neither would we to Ohio. Among German people only left-handed plows are used, while the reverse is the case with people from Mexico and Italy. I cannot tell why this is so, but it is."—Pittsburg Dispatch.

Woodwork.
Hereafter there is to be no woodwork whatever on German men-of-war. This is a direct outcome of the battle at Yalu, in which many of the vessels engaged were disabled in some degree by the burning of inferior woodwork.

One of Our Faults.
One of our greatest faults probably is that, without thinking much about it, you bore people.

A WAR ECHO.

EVERY HONORABLE VETERAN DESERVES A PENSION.

And the Lone Linn is not the Only Reason for a Government Reward Either.

(From Journal, Linton, Mo.)

Samuel R. Jordan has just given the Journal an account of his life, which in view of his extremely hard lot for the past few years will be read with interest.

"I am 43 years old and have always lived in New Portland, Linton in the army in 1862 as a private in Company A, 28th Me. Volunteers. My army experience injured my health to some extent, although I worked at blacksmithing some part of the time. When suddenly, several years ago, I was prostrated with what able physicians pronounced locomotor ataxia. At first I could get around somewhat, yet the disease progressed quite rapidly until I had hardly any feeling in my legs and feet, they felt like sticks of wood and I grew so much weaker that I could not move for three years without help, as my neighbors and friends could testify. I employed several physicians in my vicinity, and elsewhere, and they all told me that medicine would not help me, that they could do nothing to effect a cure, and that in time I should become entirely helpless. I became discouraged. I was a great care to my wife and friends. Shortly after I met an old army comrade, Mr. A. L. Parlin, a resident of Madison, Maine, and he incidentally mentioned how he had tried Dr. Williams' Pink Pills for a severe case of paralysis and a spinal and muscular trouble, that he had suffered with consequent of his army life, and how greatly benefited he thereby was. By his earnest recommendation I was induced to try the pills. After taking them for a time I began to feel prickly sensations in my legs and a return of strength. I could move more than a little. After a few weeks I began to feel a marked improvement in my condition. I am now enabled to move about, and I am now enabled to move about, and I am now enabled to move about."
